

iM30 MASSAGE CHAIR

The Onelife iM30 Massage Chair provides a massage with a human touch, combining massage therapy along with music therapy to deliver the ultimate in relaxation. After scanning your back, neck and shoulders, the Onelife iM30 will pinpoint your critical acupressure points and then automatically tailor a massage to your individual needs. Partner this to the latest airbag technology and you have the most personalised of full body massage. The chair can be reclined from the upright position and will lay flat at the touch of a button for extra comfort.

QUICK FACTS

Massage Therapy

The therapeutic use of the iM30 massage chair benefits all areas of the body; in particular the muscular, circulatory, immune and nervous systems.

Acupressure Points

Before the massage program begins, quad rollers glide along the length of your back to detect acupressure points with the use of optical sensors. The iM30 then provides you with a completely personalised massage experience.
